

## MFT GATEWAY BUILDING Reno, NV

MFT's Principal and his wife are the building's Owners. MFT served as the prime consultant and provided structural design and engineering of this 22,000sf corporate office building.

The two-story structure consists of concrete over metal deck supported by open web steel joists. The lateral framing, designed to resist wind load and seismic forces, is a steel-braced system.

The MFT Gateway Building was officially opened in June 1999 and incorporates an open atrium lobby with manufactured wood product roof system.
