

SUTTER COAST HOSPITAL ADDITIONS Crescent City, CA

MFT was also Engineer of Record for a new 4,832 sf skilled nursing facility here. The scope included two handicap patient rooms, handicap isolation room, three 2-bed patient rooms, a nurse station, a medical preparation area, offices, lounge and staff & public restrooms. Also included were dining/recreation areas with terrace. A special consideration during the design process including an expansion joint between the existing and new buildings, structure and bracing, and canopy structure design at the terrace and entry. The project conforms to ADA and OSHPD requirements.

Munah Tarazi was Engineer of Record for structural design for the addition and remodel of this one-story 8,000 sf surgery and emergency room. This project, containing approximately 7,000 sf of new construction and 3,000 sf of renovation, accommodates a new ambulatory surgery unit with significant modifications to the existing in-patient surgery suite.

Major components include two new operating rooms, endoscopy, nine same-day stay beds, each with four recliners, a relocated recovery area with five bays, reconfiguration of central decontamination, sterilization and central supply, and a new pathology lab.
