

TOM HAWKINS NEW K-8 SCHOOL

Tracy, CA

MFT provided structural and seismic design for this new K-8 school, which features a fair amount of architecturally exposed structural steel buildings. The new school, currently educating 734 K-7 students, contains an administration building/teacher's lounge (2800sf), a kindergarten building (2800sf), a multi-purpose room/gymnasium (11,500sf) and a library (2300sf).

The school is named after Tom Hawkins, who for over 30 years served as a teacher, principal and superintendent for the District.
