

WHISMAN ELEMENTARY SCHOOL

Mountain View, CA

The Whisman Elementary School multi-purpose room was the school's only assembly space and was heavily used for many years. By 1997, the 4400 sf masonry and wood frame building needed extensive cosmetic upgrades, plus architectural and structural modifications to meet ADA requirements.

The MPR remodel added a major stage structure at one end of the room and substantial additional storage, repaired the effects of years of heavy use, corrected seismic deficiencies and added the required upgrades.
